About Me

Mobile app enthusiast with a keen interest in Flutter development and creating seamless user experiences. Proficient in building functional and visually appealing apps using Dart, Firebase, Provider, SQLite and GetX. Motivated to learn, grow, and contribute to a forward-thinking tech team as a Flutter intern.

PROJECTS

Banking App

- I have created a banking app name Cloudbank360.
- In this project I have interacted with different UIs.
- I have used firebase authentication for login and signup.
- My project shows I can work with tools like Flutter, APIs, databases to build apps.

TODO App

- In this project I have learned some new things like how to manage local database.
- I used SQLite for locally manage the database.
- I have used date time picker for setting reminder.
- In this project i have worked with Provider for state management.
- Used CRUD functions to create, add, update or delete tasks.

Notes App

- In this project i have worked with offline database SQLite for managing data offline.
- Used CRUD operations to create, read, update, delete notes.
- The theme of the app depends upon the system theme.
